EDUCATION

2024-2026 (Currently)
Ganpat University

- M.Sc(CA&IT)
- GPA: 7.67 / 10.0

2021-2024

Ganpat University

- B.Sc(CA&IT)
- GPA: 7.67 / 10.0

Navyug school , himmatnagar

- HSC (2022): 70.00%

I.g.s.m high school

- SSC (2020): 70.00%

skills

- Python
- React
- JavaScript
- CSS
- Bootstrap
- Unity
- Django
- MySQL
- Unreal Engine

Soft skills

- Teamwork
- Time Management
- Critical Thinking
- Planning
- Communication

Profile Summary

Motivated and detail-oriented Python Developer with hands-on experience in building and maintaining scalable backend systems. Proficient in data handling, data analytics, debugging, and performance optimization. Adept at collaborating with cross-functional teams to deliver robust and efficient solutions. Eager to contribute to innovative projects while continuously expanding technical knowledge. Seeking a challenging role in a dynamic organization to grow professionally and support organizational success.

Experience

Manektech

Python developer

(nov 24 - currently)

Developed and maintained robust backend systems using Python, ensuring clean, efficient, and scalable code. Designed and implemented RESTful APIs to support front-end integration and enhance user experience. Collaborated closely with front-end developers, designers, and project managers to align technical solutions with business goals. Participated actively in code reviews to maintain code quality and share knowledge across the team.

Qspiders

Python developer Intern

(Mar 24 - sept 24)

Interned at Qspiders Ahmedabad gaining expertise in HTML, CSS, JavaScript, React js, Python, and SQL. Enhanced my presentation abilities by working on diverse projects and engaging in practical exercises.

Projects

Blogging Website (Django+ React)

- Developed a full-stack e-commerce platform using React, Tailwind CSS, Django, and Django Rest Framework. Implemented user authentication, product filtering, cart management, wishlist, order tracking, and profile management with a responsive UI and interactive animations.

Loan Approval Prediction (ML Algorithms)

- Built and optimized a machine learning model using algorithms like XGBoost, Random Forest, and Neural Networks. Achieved high accuracy through advanced feature engineering, cross-validation, and evaluation using ROC-AUC, with XGBoost emerging as the best performer.

Face Recognition Attendance

- Developed a Python Face Recognition Attendance System using advanced computer vision technology. Automated attendance management with accurate individual identification. Implemented absentee notifications via email for improved efficiency.
